# Temperature Certification

**In order to certify your instrument(s) we need to know:**

- Accreditation: ISO 17025 or NIST w/DATA.

- Name of instrument manufacturer.

- Range of the instrument to be tested (e.g., 0/150°F).

- Serial Number (Manufacturer serial # or a number given by quality control).

- Accuracy of instrument (e.g., +/- 1°F)
    We can help you find the manufacturer's original accuracy if you don't know.

- Cycle time (How often the unit needs to be tested, e.g., 1 year).

- Temperature points to be tested (e.g., 32°F, 75°F, 125°F)
    2 points minimum, to as many points as you require.

- Special Certification
    Specific Test Points and Accuracy testing to meet your requirements.

- Purchase Order #
    Or
- Credit Card #

- Contact person, phone number, and email address.

Normal turn-around time is one week.
